| Corrosivity Category | | Exterior | Interior |
|----------------------|--------------|--|--|
| C1 | 置 | | Heated buildings with clean atmospheres, e.g. offices, shops, schools, hotels |
| C2 | ==== | Atmospheres with low level of pollution; mostly rural areas | Unheated buildings where condensation can occur, e.g. depots, sports halls |
| C3 | <u>• </u> | Urban and industrial atmospheres, moderate sulfur dioxide pollution; coastal areas with low salinity | Production rooms with high humidity and some air pollution, e.g. food processing plants, laundries, breweries, dairies |
| C4 | | Industrial areas and coastal areas with moderate salinity | Chemical plants, swimming pools, coastal ship and boatyards |
| C 5 | | Industrial areas with high humidity and aggressive atmosphere and coastal areas with high salinity | Buildings or areas with almost permanent condensation and with high pollution |
| СХ | | Offshore areas with high salinity and industrial areas with extreme humidity and aggressive atmosphere and subtropical and tropical atmosphere | Industrial areas with extreme humidity and aggressive atmosphere |
